Education

University of Waterloo

Bachelor of Computer Science
Sep 2016 – Jun 2021

Relevant courses

Elementary Algorithm Design
and Data Abstraction, Object-
Oriented Software
Development

Skills

Languages

C++, C, HTML5, CSS3,
JavaScript, Scala, Swift

Frameworks

Node.js, React, React Native,
jQuery

Database

MongoDB

Operating Systems

Linux, Mac OS, Windows

Experience

Software Development Co-op

China Mobile Group Design Institute Co., Ltd. Beijing, China

May 2017 – Aug 2017

- Implemented “quick sort” to sort user location data by coordinates for analyzing user behaviors
- Created a C program that divided Baidu Map into a matrix of coordinates to represent collected data
- Optimized internal website by implementing responsive features for mobile devices

Projects

Mr.Schedule

github.com/wtyanan/Mr.Schedule

- A WeChat Miniprogram (embedded in WeChat) provides students a simple timetable to input their courses and view it as a daily schedule
- Developed using HTML, CSS, and JavaScript, implemented input for course information, edit function, and display function
- Currently has more than 1400 total users, and an average 15 – 20 active users per day

NoBored

github.com/wtyanan/UofTHacks

- A Google Home application developed with Actions on Google (a platform created by Google for developing Google Home applications) during UofTHacks 2018
- Provides suggestions of nearby events based on user's response
- Developed using Firebase with Node.js as the backend service, and Dialogflow for analyzing conversations

KWCSSACalendar

github.com/wtyanan/KWCSSACalendar

- A “Calendar like” WeChat Miniprogram for KWCSSA (Kitchener – Waterloo Chinese Students & Scholars Association) members to keep track of events
- Supports user groups, event visibility control and event priority display functions
